### B. B. Gampy Rapply of Sulfed Award By

### BUT HE WAS NOT INJURED

"About 1240 p.m. Saturday Number 95, Winnings Extreme, Was partially iteration about two miles west of Tettenham, five of patterning over on a fitteen foot enternisment. About fifteen passengant injured, and only two or three military, none fatally. Treet and rolling stock were in good ment rolling stock were in good ment not yet apparent."

#### Relief Arrived

Just as soon as the news of the wreck reached the city a wrecking train was immediately despatched from Toronto Junction to the scene of the accident. Subsequently a special train with General Superintendent Oborne of the O.P.R., Dr. H. A. Beatty, divisional surgeon of the company, and Drs. Milne and Clendenan of Toronto Junction and two nurses from the Western Hospital left at 2.45 a.m. Sunday morning, and a fast run was made to Tottenham. On their arrival they found the injured passengers laid out on the grass, and no time was lost in attending to their injuries. After dressing the wounds of those most seriously injured General Superin-tendent Oborne arranged to have them conveyed to Toronto, and at 3.40 o'clock an emergency call was sent to police headquarters to have two amjured, which reached the crossing at the head of Bathurst street shortly after five o'clock. The women were placed in the ambulances and the two men were brought in backs to the Western Hospital, where everything was in readiness to receive them. The injured stood the journey well, especially the two women, who were the greatest sufferers. On the way down Mrs. Sword, who is badly bruised about the body, had to be given stimulants, and it was at first feared that she might not be able to stand the journey. Both women were unconscious when admitted to the hospital. Of the men Mr. Taylor, who was on his way home to Parry Sound after a business trip, was the most serious-ly injured. His right ear was almost severed and his shoulders bruised. He was promptly placed on the operating table, and several stitches were re-

## Drawing Cement

The C. P. R. trains have, started to draw cement from the Brant lakes, to the Durham Gement Factory: So far it has been all outlay on this line, but, now the revenue will be coming in. Speaking of cement, these Brant lakes have saved the situation for the Durham factory. When this factory was tirst started, we were told that there was enough cement in Durham to last a hundred years. Instead of that it hasn't lasted ten, and had it not been for the Brant lakes and the C. P. R. the factory at Durham, would, as we have said, been forced to go out of business. And if Dan Knechtel and the men who are associated with him in d his the Hanover cement factory, had only been a little swifter, Eurham would have been cut out anyway. What the Hanover cement men should have done was to have bought all the lakes in sight instead of being content with two or three of them. But Dr. Jamie. son was too swift for them and managed to get a few of what was going in the way of cement lakes. And so Durham will get plenty of marl, while Dr. Jamieson will get a royalty of 2cts a barrel. The Durham factory consumes 1200 barrels of marl a day. This means \$21 a day for Dr. Jamie son or a little over \$7000 a year, leaving out Sundays. In the course of 25 years or so, at that rate. Dr. Jamieson ought to be able to retire from husiness.

A great deal of dissatisfaction was felt and expressed by the excursionists who visited Owen Sound last Monday by way of the C.P.R.-Sons of England special train which started from Brampton and carried a good many Orangeville people, including a dozen lawn bowlers.

The return trip was advertised to begin at seven o'clock. The day was the hottest of the season, but everyone hurried to, through and away from his evening meal, or went without it, after winning or losing at his particular pastime. Our bowlers won.

Just when the bus was leaving the Patterson house for the station someone heard a rumor that the train would go at eight instead of seven. The telephone was used but the C.P. R, people professed ignorance of such an arrangement. The hustling continued, the station was reached just before seven, and for sixty mortal minutes four hundred tired damp and dusty pleasure seekes, all the way from 70 to 100 miles from home, contemplated the shack which serves Owen Sound for a railway depot, the rear elevation of the Athabaska lying at her dock, and the graceful gulls collecting the rejected morsels cast into the slip from the aforesaid liner. Or again they hoped for a glimpse of General Foreman, the distinguished military man who has his office in an other shack hard by. But the General had not returned from the anwars or peradventure had retreated before the mad charge of the four hundred and was even then entertaining his messmates with the story of his escape and the trap in which he had left the enemy. Exactly at eight o'clock the train moved out. It was a good train; the coaches were clean, light and airy, ed out. and it made good time and ran BUT a tired and hungry smoothly. excursionist who has 100 minutes instead of 40 minutes to get his supper and catch his train would like know it. He may be anxious to get home but he doesn't want to be hurried and delayed at the same time. It is perhaps too much to hope that 1Vpassengers will ever be told WHY a of train due to leave at seven leaves at ied These passengers paid their money to leave Owen Sound at seven, but that is another story. are

What we would like to learn is why railway employees are not allowed to give the public the information they possess on subjects like the starting | m of trains.

July 9, 1908

Open to Hanover.

The C. P. R. is now open to Hanover, and a regular service, both passenger and freight, has been established. Two regular passenger trains run every day from Hanover to Proton, one leaving Hanover about 7 o'clock in the morning and the other about the same hour in the evening. there is no turning table at Hanover the engine has to back in. There will be a regular train service from this It will not bellong before regu tar trains are running into Walkerton. Already the rails hive all been laid, and all that is now to be done is the ballasting, which will only take a few days.

## WALKERTON AND LUCKOW RAILWAY

August 1908

p. 471

The contract was signed for 37 miles of railway from Proton to Walkerton.

March 1908

p. 199

The track laid up to December 31st, 1908 was from Mile-post 0.0 tp M.P 24.Construction trains are running from Hanover since Christmas. A big pile bridge had to be erected before tracklaying could proceed towards Walkerton.

May 1908

p. 337

Walkerton and Luckow railway a spur line was graded from Hanover to Brant for the convience of the Durham Cement Company.

September 1908

p. 623

The Walkerton and Luckow Railway second section of the line from Hanover to Walkerton eighteen miles was opened august 10<sup>th</sup>, 1908

October 1908

p. 577

Grading was completed from Durham to Proton.

#### ST MARYS AND WESTERN RAILWAY

June 1906

p.400

The contract was let from St Marys, Ontario to Embro.

January 1908

p. 23

The section between St Marys and Embro was nearly ready for tracklaying. The Canadian Pacific would construct a short section from the old mainline at Embro station.

March 1908

p.

Track was laid on the first three miles of the line and grading was in progress upon the remaining twelve miles. No ballasting had been done. J. E. Webb of Toronto is the contractor.

July 1908

p. 475

St Marys and western, tracklaying on the line from Embro toSt Marys was completed and the first construction train ran into st Marys occurred on May 29<sup>th</sup>, 1908. Ballasting occurred. Regular train service started July 1<sup>st</sup>, 1908. Station buildings were erected atFarmers Cheese factory, Lakeside and Bennington, and a temporary shelter was erected at St Marys. A permanent structure was not put up pending the route to S|arnia.

August 1908

p. 549

The section of this line from Embro to St Marys, Ontaro was opened for traffic on July 1st, 1908.

September 1908

p.623

St Marys and Western nearly completed.

# IDEAL SNOW PLOW WAS WRECKED

Jumped the Track at the Caledon Horseshoe and Completely Tied Up Traffic-It Had Just Been Rebuilt

On Tuesday afternoon a way freight on the C.P.R. picked up the Ideal snow plow that had been in the yard here for several days with the inten-tion of taking it to Toronto. It was hitched on to the rear of the train and everything went well until the Caledon horseshoe was reached, when the plow jumped the track and tore it up for a distance of about 75 feet, causing a complete blockade of traf-

PLOW WAS WRECKED

The Ideal snow plow is a new invention. It was built at Kincardine last year and was tried out on the branches here during the winter and worked fairly well, but several improvements were suggested and the plow was taken to Owen Sound and was completely rebuilt this summer It was all in readiness for business during the coming winter. The plow was very badly wrecked and will have to be entirely reconstructed, which will exect a great deal of maney. The will cost a great deal of money. The company which manufactures the ma-chine is made up chiefly of railway men and the loss to them will be considerable.

The passengers of both evening trains had to be transferred at the scene of the wreck and the trains were about four hours late in arriving. Fortunately no person was in-

ATTEMPTED HOLD-UP

Ugly Characters Try to Rob the Everett-Mansfield Stage

The Alliston Herald tells this thrilling story: A bold but unsuccessful attempt was made on Friday about noon by a pair of ugly-looking characters to hold up the mail stage running from Everett to Mansfield. The stage is driven by a young man named Edward Anderson and he was making his way along the road he-tween the 7th concession of Mulmur-Tossorontio townline when a pair of highwaymen suddenly sprang out of the bushes at the roadside and ordered him to stop. The young fellow took in the situation instantly and decided to make a run for it. He pulled out the whip and in a second or two had the horses on the gallop with the half the road running halfing half and the half the road running halfing halfing the half the half the road running halfing halfing with the hold-up men running behind and shouting vengeance it he did not stop. The pair, however, soon abandoned the race and slunk into the hush. The highwaymen are described as a very tough-looking pair about twenty years of age with the general appearance of belonging to the tramp fraternity. One of them was bare-

Since the attempted robbery several latmers have reported being accost al farmers have reported being accost ed along the same road by a pair of hard-looking characters, but so far as known they have not succeeded in securing any hooty. The affair on Friday has been reported to the authorities, but the highwaymen have not yet been cantured. not yet been captured.

ORANGEVILLE, ONTARIO, THURSDAY, AUGUST 27, 1908.

## WILL MAKE IT HOT FOR DEPOT BUMS

Boys and Girls Who Hang Around the C.P.R. Will Be Forced to Move On

If the parents of a number of boys, between the ages of T and 14, are called upon to defend their sons in the police court some of these fine days do not be surprised. It is strict ly against the law for children not accompanied by a proper guardian to accompanied by a proper guardian to visit the railway station. Out of twenty boys at the C.P.R. depot Monday night, who were questioned as to their business there, only six Monday, night, who were questioned as to their business there; only six admitted being on the premises for the sole purpose of delivering the evening papers. To meet the trains and get their supply of evening papers is a necessity, but when the other 11 out of the 20 boys mentioned above are rip-tearing around the station, through the cars, in front of moving trains and into other mischiel, such as cutting their initials on the station house, etc., we do not wonder at the officials sending a detective to make trouble for the parents who allow their youngsters to run at large. After this only newsboys will be allowed to visit the station without a guardian and then they will be required to furnish proof that they are there for that purpose only. Others caught there out of idle curiosity or mischiel making will be forced to give their names and the parents will be called upon to defend them on a charge of trespass.

GIRLS ARE IN IT TOO

For quite a white a number of girls have been meeting the trains every night and making nuisances of themselves and they too, will be asked to vacate the premises. The girls' ages range from 13 to 17 years and some of them have already started on the downward path. They have become steh a nuisance at the depot that the station, where they chalter to freight train hands and generally make fools and nuisances of themselves.

Patrons of the C.P.R. will be glad to heat that measures are being taken to rid the station premises of the youthful male and female bums who have infested the place so long.

August 27, 1908 Orangeville.

Fire did \$75,000 damages at the Standard Scap Works, Calgary.

Fire underwriters have raised the rates in London. Ont., owing to the shortage of water.

The C.P.R. roundhouse and the W. R. Thompson Company's sawmill at Tees-water were burned.

George Gibson, while driving home from Chatham, was struck by a train at a M.C.R. crossing and killed.

Saturday's nominations: — Liberals, East Grey, Mr. E. Raymond, Conservalives, South York, Mr. V. S. Maclean; Leeds, Mr. George Taylor; North: Water-loo, Mr. E. Reid: East Elgin, Mr. D. Marshall.

Western Crop Situation.

Monday's Toronto Star |contains a letter from its special correspondent at Regina on the crop situation. says that he has been pietty much over the whole country and finds the conditions fairly satisfactory. Already on the light land the binders' were at work, and he thinks that by the 15th, harvesting will be in full swing all over the country. He places the average yield at 20 bushels to the acre, which is about an average erop. At that estimate the entire yield of wheat would be about 110,000,000 bushels and will bring in a money return of from \$65,000,000 to \$70,000,000. There ought to be a return of \$26,000,000 from oats. and also a considerable sum from barley and buckwheat. On the whole then it seems like a good year for the west.

Eligible for Normal.

The result of the examination for entrance to the Normal schools, appeared in Saturday's papers. This examination takes the place of the former Junior Teacheres' Examination, and is the academic test for fitness for second class teachers' certificates. In the course of a few day the certificates of those who passed, and the marks of those who failed will be fowarded to public school Inspectors and the principals of the high schools, If anybody wants to appeal, the appeal must be sent in before the list of Sep-Below will be found the tember. names of those who passed from Walkerton. The school has apparently done well. It will be observed that most of these who passed, | took | honors: --Maggie Campbell! The new railroad was opened to Walkerton on Monday morning last, and trains now run regular from there to Saugeen Junction and back twice a day. The electric bell installed at the | foot of Garafraxa Street Hill is likely the full measure of protection to be given us by the Commission. Though perhaps not so safe as a gate and watchman, it gives sufficient warning for people who have their wits about them, and it is certainly not so unsightly as a gate would be. Citizens of Durham have been treated generously by the U. P. R. Co. in the prices they paid for lands along the right of way, and this treatment has a tendency to make us feel kindly disposed We hope to see such towards them. a measure of prosperity that both railroads will be taxed to their utmost capacity.

THE TRAIN CREW

The coming of the C. P. C. to Walkerton will mean quite a permanent addition to our population. The line will no doubt ultimately be continued on to Inverhuron, or some point on take Huron but that will not be for many years to come. For the present and immediate future Walkerton will he the terminus and the whole line will be operated from this end. the train hands will reside here and such being the case the sooner we get acquainted with them the better. The outfit for the present is as follows: --STATION AGENT-Jas: Williams, Comes here from Albston, about 40 years of age, and has been in the railway business all his life, Marriel and has three of a family.

CONDUCTOR—Thos II. Patterson. Formerly located at Havelock, east of Peterboro. A man of politicand affable manner. Has a wife, and two daughters.

ENGINEER -R. Flint. Family now residing at West Toronto. Will move here as soon as possible. Mr. Flint is a big, husky looking chap, and if he bad to work 20 hours out of the 21 it wouldn't bother him much.

EXAGNOEMAN - C. J. Robertson Comparatively a young man, but married and has a family He is the man who will look after the exAugust 13

BAGGAGEMAN-C, J. Robertson. Comparatively a young man, but married and has a family. He is the man who will look after the express and other parcels. Has a bright air about him and seems to know his business!

The other member of the craw me both young men. They are W Urquhart brakeman and John Hogan, fireman.

But although the trains are now edrunning regularly, the work, around am; the station and yards is by no means Th completed. A large gang of men are to still engaged on the station itself. out The turn-table has not yet been placlof! ed, the pumping applicatus is not yet completed, there is a freight shed to be the built, and then there is the space between the street corner at Dr. Forfur tune's and the station to fill up with clay. Where this clay is to come from has not yet been decided upon, but it will likely be brought by from titi some distance. A steam shove! will his be utilized in this work,

August 1908

# G.P. R. BRANGH NOW IN OPERATION

Opened On Dominion Day From Saugeen Junction To Hanover.

Two Trains Each Way
Daily. Close Connection
With Toronto But Poor
With Owen Sound.

The much-talked about and long wished for C.P. R. connection for c. Hanover has at length become a function of the control of t reality. For some years Hanover as an industrial centre has suffered through having only one railway, and longing eyes were directed towards the Canadian Preitie. Then came rumors of a C. P. R. K particulars, and then came the engineers to map out the course. It has taken longer than at first was supposed even by the experts, wand has cost a pile of money. The railway magnates don't give out private information of this character. ter, but it is understood to have cost several million dollars. Hanover possessing the two main lines of railway, and with an enviable m reputation as a manufacturing se centre should make good progress and it is up to our citizens to help la make her go. The Industrial Association should come to life again after a long sleep and work hand in hand with the council in endeavoring to make Hanover presper. The C.P.R. has inaugurated a freight and express business as well as the passenger, and are out to make the branch go. Mr. D. Kennedy, a relieving agent. is at present in charge of the flan-over depot. Mr. C. Herrington is Re the conductor on this road.

The line from Saugeen Junction, near Proton Station, to Hanover was opened for traffic on Dominion Day, 90 passengers being on board the first day. Since then the company has been doing a very fair business. There is at present a service of two trains each way daily, which make close connection with the trains to and from Toronto. The time-table is as follows: Leave Hanover 6,45 a.m., arrive Saugeen Sunction 8,10 a.m.; leave Saugeen Junc. 11,45 a.m., arrive Owen Sound 1,10 p.m. Leave Hanover 3 p.m., arrive Saugeen Junction 8,25 p.m., leave Saugeen Junction 8,15 a.m., arrive Saugeen Junction 11,45 a.m. arrive Saugeen Junction 11,45 a.m. arrive Saugeen Junction 11,45 a.m. arrive Hanover 1,20 p.m. Leave Owen Sound 3,20 p.m. arrive Saugeen Junction 4,42 p.m. leave Saugeen Junction 4,50 p.m. Leave Owen Sound 3,20 p.m. arrive Saugeen Junction 4,42 p.m. leave Saugeen Junction 5,50 p.m. leave Saugeen Junction 4,42 p.m. leave Saugeen Junction 6,50 p.m. Leave Hanover 1,20 p.m. Leave Manover 1,20 p.m. Leave Manover 1,20 p.m. Leave Saugeen Junction 4,42 p.m. leave Saugeen Junction 6,50 p.m. leave Saugeen Junction 8,50 p.m. leave 6,50 p.m. leave 6,50 p.m. leave 6,50 p.m. leave 6,50

The Owen Sound Sun commenting on the time table says: The what service as far as Owen Sound is stated to the closest connection gives pass and sengers from this end of the line a Mr wait of three hours and a half at imparation, where there is for nothing but the station. These ahingures, however are stated not too do be final, and may be changed. If due they are it is to be hoped that they evident of the line will of receive some consideration in the new shape of closer connection.

The first colonist train over this branch of the C. P. R. was run on Friday morning last. It consisted of nine coaches and two baggage cars. Amongst those who went from Durham were:-Fred Ritchle, Murray Ritchie, Edgar Ritchie, Geo. Nichol, W. Paniels, W. Firth, Ab. Noble, Palmer Patterson, Man Allan, Thomas Allan, Robert Pettigrew, Mrs. Quinton Pettigrew, Albert McClinton, Robert Petty, Milton Ard, Wellington Ard, Geo. Chapman, Nathan Grierson, John Picken, Robert Morice, W. Lawrence, J. Boakes, Miss Mary Dennet, Rod. Macfarlane, Charles Saunders, John Marshall, W. Wilkle, Miss Cassie Wilkie, Geo. Twamber, John Ewen, A. Park, J. Park, Alf, Betts, J. Brown. Miss Brown, Pred Rall, D. McCrie, W. Clark, Mrs. R. McLine, G. Michille Eura Modornal Capture Follogs D WIED CHAPAN INVESTIGATION

## IDEAL SNOW PLOW WAS WRECKED

Jumped the Track at the Caledon Horseshoe and Completely Tied Up Traffic-It Had Just Been Rebuilt

here for several days with the intention of taking it to Toronto. It was and everything weat well until the Caledon horseshoe was reached, when the plow jumped the track and tore

PLOW WAS WRECKED

The Ideal snow plow is a new in-vention. It was built at K-incardine last year and was tried out on the branches here during the winter and worked fairly well, but several imcompany which manufactures the ma- footed. chine is made up chiefly of railway men and the loss to them will be con-

ATTEMPTED HOLD-UP

Ugly Characters Try to Rob the Everett-Mansfield Stage

The Alliston Herald tells this thrilling story: A bold but unsuccessful On Tuesday afternoon a way freight attempt was made on Friday about on the C.P.R. picked up the Ideal noon by a pair of ugly-looking charsuow plow that had been in the yard arters to hold up the acters to hold up the mail stage running from Everett to Mansfield. The hitched on to the rear of the tenin stage is driven by a young man manied Edward Anderson and he was making his way along the road be-tween the 7th concession of Mulmarit up for a distance of about 75 feet, Tossorontio townline when a pair of causing a complete blockade of trafthe business at the roadside and ordered him to stop. The young fellow took in the situation instantly and decided to make a run for it. He pulled out the whip and in a second or two had the hereas on the gallon or two had the horses on the gallop with the hold-up men running behind worked lattly well, but several improvements were suggested and the plow was taken to Owen Sound and shouting vengrance if he did not stop. The pair, however, soon abandars completely rebuilt this summer if was all in readiness for business during the coming winter. The plow was very badly wrecked and will have to be entirely reconstructed, which will cost a great deal of money. The fraternity. One of them was barecomeany which manufactures the mar footed.

Since the attempted robbery several farmers have reported being accost The passengers of both evening trains had to be transferred at the scene of the wreck and the trains were about four hours late in arriving. Fortunately no person was injured. Horsestae Unic Horsestae Unic

## WILL MAKE IT HOT FOR DEPOT BUMS

Boys and Girls Who Hang Around the C.P.R. Will Be Forced to Move On

li, the parents of a number of boys, between the ages of 7 and 14, are called upon to defend their sons in the police court some of these fine days do not be surprised. It is strict days do not be surprised. It is strict by against the law for children not accompanied by a proper guardian to visit the railway station. Out of twenty boys at the C.P.R. depot Monday night, who were questioned as to their business there, only six admitted being on the premises for the sole purpose of delivering the cras to their pusiness there, only six admitted being on the premises for the sole purpose of delivering the evening papers. To meet the trains and get their supply of evening papers is a necessity but when the other 14 out of the 26 hoys mentioned above are off-tearing around the station, through the cars, in front of moving trains and into other mischiel, such as cutting their initials on the station house etc., we do not worded at the officials sending a detective to make trouble for the parents who allow their geoughters for our at large. After this only newsboys will be allowed to visit the station without a gundan and then they will he required to furnish proof that they are their boards of the parents will be called upon to defend them on a charge of trespass.

GIRLS ARE IN IT TO

GIRLS ARE IN IT TOO

For quito a while a number of girls have been meeting the trains every night and making nuisances of themselves and they too, will be asked to vacate the premises. The girls, ages range from 18 to 17 years and some of them have airready started on the downward path, step the depot that the rathway authorities have depending around to probabil them hanging around the stathed, where they charter to freight that hands and generally make hous and nuisances of themselves.

Patrens of the C.P.R. will be glad

and adsances of themselves.

Patrens of the C.P.R. will be glad to heat that measures are being taken to rid the station premises of the voulbful male and female hums who have infested the place so long.
